383 Stroker - West Coast Engines
The 383 stroker engine has a bore of 4.03 inches and a stroke of 3.75 inches versus the GM 350's bore of 4.00 inches and 3.48 inches of stroke. The 383 cubic inches are calculated by the following formula: the bore of 4.030 is multiplied by the bore of 4.030 then multiplied by the stroke of 3.75 then multiplied by 0.7854, then multiplied by the eight cylinders to equal 382.668.

All CNC-Motorsports crate engines are 100% machined, balanced, blue-printed and dyno tested with your fuel system and ignition to ensure guaranteed quality and performance before shipping.

383 Stroker - Crate Engine at CNC Motorsports
The Chevy 383 Stroker is an 8 cylinder engine that uses the popular production Chevrolet 350 block and a slightly altered Chevrolet 400 crank. A stock 350 has a piston stroke length of 3.48 inches. The 400 crank changes the 383 to a total stroke of 3.75 inches. This produces a total displacement of 383 cubic inches (thus the name 383).

Chevy 383 450HP Stroker "LOUD" - YouTube
If your car is screaming for big-block power but your wallet is crying for small-block mercy, then a budget 383 might be just the silencer you're looking for. The first 383 strokers were based on 350 blocks and utilized a 400 small-block crankshaft to increase cubic inches. That was back when 400 blocks were fairly common and manufacturers hadn't yet figured out that a 3.75-inch crankshaft costs about the same to cast as a 3.48-inch unit.

How to Build a Budget 383 Stroker Chevy Engine | It Still Runs
Some common applications for this engine are the classic Chevy Nova, Chevy Camaro, and almost any other classic Chevy body. The creation of the Chevrolet 383 Stroker was born out of creativity. The engine is essentially a Chevy 350 block, but uses a modified crankshaft from the Chevy 400 for increased stroke and as a result increased displacement.
