integrating technological tools and environments in mathematics teaching and learning. This work is being built on the discussions at the mini-symposium on Creativity and Technology at the International Conference on Mathematical Creativity and Giftedness (ICMCG) in Denver, USA (2014), and other contributions to the topic. The book emphasizes a diversity of views, a variety of contexts, angles and cultures of thought, as well as mathematical and educational practices. The authors of each chapter explore the potential of technology to foster creative and divergent mathematical thinking, problem solving and problem posing, creative use of dynamic, multimodal and interactive software by teachers and learners, as well as other digital media and tools while widening and enriching transdisciplinary and interdisciplinary connections in mathematics classroom. Along with

Doors, a volume of papers from the third annual Financial Markets and Development conference, multidisciplinary financial sector experts analyze current economic and political trends and prescribe practical advice to the financial development community. The book addresses the key issues of concern regarding the emerging markets, including the trends, motivations, and scope of FDI in finance; policy options that will best capture the opportunities of foreign entry; and the role of foreign institutions in e-finance innovation. The authors focus on specific topics such as foreign participation in emerging market banking systems and securities industries, WTO policies and enforcement, the role of foreign banks, liberalization of insurance markets, the need for capital markets, and the policy, regulatory, and legal issues associated with e-finance. For policymakers and financial practitioners affected by the WTO's
