2017 Update  
forecasts gross domestic product in the region expanding by 5.7% in 2017 and 2018, near the 5.8% pace in 2016. Higher external demand, rebounding global commodity prices, and domestic reform support widespread acceleration, with growth picking up in two-thirds of the region's 45 economies. Developing Asia

## **ASIAN DEVELOPMENT OUTLOOK 2017**

Asian Development Outlook (ADO) 2017: Transcending the Middle-Income Challenge Publication | April 2017  
Developing Asia has continued to perform well, even as recovery in the major industrial economies remains weak. The region is forecast to expand by 5.7% in 2017 and 2018, nearly the 5.8% growth achieved in 2016.

## Download Ebook Asian Development Outlook Ado 2017 Update Sustaining Asian Development Outlook (ADO) 2017: Transcending the ...

Developing Asia is now expected to grow by 5.9% in 2017, or 0.2 percentage points higher than the rate previously envisaged. The smaller upgrade in the 2018 growth forecast—5.7% in ADO 2017 to 5.8%—reflects a cautious view on the pace of the turnaround in external demand.

## Asian Development Outlook (ADO) 2017 Supplement: Cautious ...

The outlook for developing Asia supports optimism. Rather than the slight growth moderation forecast in Asian Development Outlook 2017 in April, this Update envisages a slight uptick this year. Growth in the region is set to pick up from 5.8% in 2016 to

the 45 economies in Asia and the Pacific that make up developing Asia. Growth prospects in the region are upbeat, buoyed by favorable demand at home and abroad. A strong performance in 2017 reflected a surge in exports, which will likely abate this year and next, and rapidly expanding domestic demand. While the outlook is for steady growth, risks to it are decidedly on the downside: Trade friction could weaken recently deepened trade links, tightening US monetary policy could diminish investment in developing Asia, and rising domestic private debt may hamper growth. New technologies drive higher productivity, the foundation for economic growth, better-paid jobs, and poverty reduction. The latest technologies in robotics and artificial intelligence may threaten

## Download Ebook Asian Development Outlook Ado

2017 Update Sustaining  
some jobs, however, and leave less-skilled workers behind. To maximize gains in productivity while safeguarding social welfare, governments in developing Asia should protect workers but not preserve particular jobs. Meanwhile, they should facilitate the countervailing forces in new technologies that generate new jobs. Dealing with the downsides of new technology requires synchronized effort on skills development, labor regulation, social protection, and income redistribution.

After a disappointing 2019, growth prospects in developing Asia have worsened under the impact of the current health crisis. Signs of incipient recovery near the turn of this year were quickly overthrown as COVID-19 broke out in January 2020 in the

# Download Ebook Asian Development Outlook Ado 2017 Update Sustaining

region's largest economy and subsequently expanded into a global pandemic. Disruption to regional and global supply chains, trade, and tourism, and the continued spread of the outbreak, leave the region reeling under massive economic shocks and financial turmoil. Across Asia, the authorities are responding with policies to contain the outbreak, facilitate medical interventions, and support vulnerable businesses and households. Assuming that the outbreak is contained this year, growth is expected to recover in 2021. Especially to face down fundamental threats such as the current medical emergency, innovation is critical to growth and development. As some economies in developing Asia challenge the innovation frontier, many others lag. More and better innovation

# Download Ebook Asian Development Outlook Ado

2017 Update Sustainability  
is needed in the region to sustain growth that is more inclusive and environmentally sustainable. Five key drivers of innovation are sound education, productive entrepreneurship, high-quality institutions, efficient financial systems, and dynamic cities that excite knowledge exchange. The journey to creating an innovative society takes long-term commitment and hard work.

The annual Asian Development Outlook, now in its 30th year, analyzes economic performance in the past year and forecasts performance in the next 2 years for the 45 economies in Asia and the Pacific that make up developing Asia. Growth prospects in developing Asia remain strong despite persistent external headwinds responsible for moderating expansion

# Download Ebook Asian Development Outlook Ado

2017 Update: Global trade and economic activity weakened toward the end of 2018, slowing growth in many economies in the region. The outlook is cloudy with risks that tilt to the downside. A drawn-out trade conflict could undermine trade and investment in the region, and US fiscal policy and the consequences of a disorderly Brexit could weigh on growth in the advanced economies and the People's Republic of China. Though the risk of sharp increases in US interest rates has subsided, policy makers must stay vigilant. Disasters are shaped by natural hazards and the dynamics of the economy, society, and environment in which they occur. They pose a growing threat to development and prosperity in the region, their consequences disproportionately severe in developing countries,

# Download Ebook Asian Development Outlook Ado 2017 Update Sustaining

especially for the poor and marginalized. As developing Asia is home to more than four-fifths of the people affected by disasters globally in the past 2 decades, the region must strengthen its disaster resilience. This means integrating disaster risk reduction into national development and investment plans, spending more on prevention for a better balance with spending on rescue and recovery, and pooling risk through insurance and reinsurance.

Growth has held up in developing Asia despite a difficult external environment. The region is expected to grow steadily at 5.7% in 2016 and 2017, the forecasts in this Update unchanged from Asian Development Outlook 2016. While global commodity prices have begun to rebound, inflation

## Download Ebook Asian Development Outlook Ado

remains largely subdued. Consumer prices will likely rise by 2.6% in 2016 and 2.9% in 2017. Continued slow recovery in the United States, the euro area, and Japan presents a clear downside risk to the outlook.

Uncertainty about the path of monetary policy in these economies, and the implications this has for capital flows, complicates macroeconomic management in developing Asia.

Policy makers globally need to resist moves toward protectionism that would only undermine the recovery. By transitioning to low-carbon growth, developing Asia is poised to reap outsized rewards as an essential player in the global effort to contain climate change.

Growth in developing Asia is holding up against external headwinds. Robust

# Download Ebook Asian Development Outlook Ado

2017 Update Supporting  
domestic demand supported the region's large economies, and oil prices above expectations boosted prospects for many oil and gas exporters. Consumer prices are picking up with rising global fuel and food prices, but moderate inflation in several Asian economies has kept the regional average in check. Downside risks to the outlook are intensifying. If tightened more than investors expect, US monetary policy could accelerate capital outflow from Asian economies and put further depreciation pressure on regional currencies. Any escalation of the trade conflict could disrupt cross-border production links. Most economies remain robust, but policy makers must be ready to respond. In the years since the Asian financial crisis of 1997–1998, sound domestic macroeconomic fundamentals and

# Download Ebook Asian Development Outlook Ado

2017 Update

buoyant external conditions have supported developing Asia's rise to become an engine of the global economy. However, the changing global landscape poses new challenges to the maintenance of macroeconomic stability. This Update explores the key pockets of vulnerability and the policy options available to manage them. To fortify the region against heightened uncertainty, policy makers may need to deploy the full range of policy tools, while forging and safeguarding the sound fundamentals that support economic, social, and political stability.

Developing Asia has suffered as the COVID-19 pandemic persists. Growth, trade, and tourism collapsed in 2020, leading to the region's first economic contraction in nearly 6 decades.

# Download Ebook Asian Development Outlook Ado

2017 Update

Governments across Asia acted quickly to contain the virus and its economic effects, and signs of bottoming out have now appeared. Inflation remains benign, constrained by depressed demand and declining food prices. A prolonged pandemic is the primary downside risk to the outlook. Persistent or renewed outbreaks and a return to stringent containment could possibly derail the recovery and trigger financial turmoil. Recovery depends on measures to address the health crisis and on continued policy support. The pandemic has highlighted the importance of wellness, both physical and mental. Wellness—the pursuit of holistic health and well-being—is a component of the UN’s Sustainable Development Goals. This report evaluates the state of wellness in Asia,

# Download Ebook Asian Development Outlook Ado

documents how the wellness economy is a large and growing part of the region's economy, and discusses how policy makers can promote wellness by creating healthy living environments, encouraging physical activity and healthy diets, and enhancing workplace wellness.

Growth prospects in developing Asia are on the rise, buoyed by a rebound in global trade as solid recovery takes hold in the major industrial economies, and by strong investment demand. Also lifting regional prospects is growth in the People's Republic of China that exceeds expectations. Consumer prices are contained, and external balances under control, as global food and oil prices recover modestly. Risks to the outlook have become more balanced since April

## Download Ebook Asian Development Outlook Ado

forecasts in this series. The advanced economies have so far avoided sharp, unexpected changes to their macroeconomic policies. Further, the fuel price rise is providing fiscal relief to oil exporters but is measured enough not to destabilize oil importers. To meet the region's infrastructure needs, developing Asia must mobilize \$1.7 trillion annually. However, even factoring in funds saved through public finance reform or received from multilateral agencies, a significant financing gap remains. This Update highlights how public-private partnership can help fill the financing gap and improve infrastructure delivery by allocating risk to the party best able to manage it. Public-private partnership effectively marshals the private sector's most valued strengths to meet public sector objectives.

# Download Ebook Asian Development Outlook Ado

Where appropriately implemented, this innovative tool can yield superior development results.

The Economic Outlook for Southeast Asia, China and India is a bi-annual publication on regional economic growth, development and regional integration in Emerging Asia.

This publication presents a detailed overview of the current state of the public-private partnership (PPP) environment in the Philippines. In over three decades, the country developed a robust public-private partnership (PPP) enabling framework through the Build-Operate-Transfer Law of 2012 and the PPP Center. Among developing member countries of the Asian Development Bank, the Philippines has a relatively mature

# Download Ebook Asian Development Outlook Ado

2017 Update Sustaining  
market that has witnessed 116 financially closed PPPs. Under the government's 2017–2022 Development Plan that has an infrastructure investment target of \$180 billion, PPPs are expected to play a pivotal role in financing national and subnational infrastructure investments. With a pipeline of 37 PPPs, the government is taking various steps to further improve the environment for PPPs.

Developing Asia is forecast to expand by 6.0% in 2018, and by 5.9% in 2019. Excluding Asia's high-income newly industrialized economies, growth should reach 6.5% in 2018 and 6.4% in 2019. With oil prices edging up and robust consumer demand continuing, inflation is poised to pick up after dipping slightly last year. Consumer

## Download Ebook Asian Development Outlook Ado

2017 Update

prices are projected to rise by 2.9% in both 2018 and 2019, or 0.6 percentage points more than in 2017. Though prospects are firm, risks are clearly to the downside. Protectionist measures and retaliation against them could undermine the recent pickup in trade growth. In response to fiscal stimulus, the United States Federal Reserve may need to raise interest rates faster than currently expected, which could diminish capital flows to developing Asia.
