Venture capitalists are the handmaidens of innovation. Operating in the background, they provide the fuel needed to get fledgling companies off the ground—and the advice and guidance that helps growing companies survive their adolescence. In **Creative Capital**, Spencer Ante tells the compelling story of the enigmatic and quirky man—Georges Doriot—who created the venture capital industry. The author traces the pivotal events in Doriot's life, including his experience as a decorated brigadier general during World War II; as a maverick professor at Harvard Business School; and as the architect and founder of the first venture capital firm, American Research and Development. It artfully chronicles Dorio's business philosophy and his stewardship in startups, such as the important role he played in the formation of Digital Equipment Corporation and many other new companies that later grew to be influential and successful. An award-winning **Business Week** journalist, Ante gives us a rare look at a man who overturned conventional wisdom by proving that there is big money to be made by investing in small and risky businesses. This vivid portrait of Georges Doriot reveals the rewards that come from relentlessly pursuing what-if possibilities—and offers valuable lessons for business managers and investors alike.

Entrepreneurs who dream of building the next Amazon, Facebook, or Google can take advantage of one of the most powerful economic engines the world has ever known: venture capital. To do so, you need to woo, impress, and persuade venture capitalists to take a risk on an unproven idea. That task is challenge enough. But choosing the right investor can be harder still. Even if you manage to get backing, you want your VC to be a partner, not some adversary who will undermine your vision in order to make a quick return. **Jeffrey Busgang** is one of a few people who have played on both sides of this high-stakes game. By his early thirties, he had helped build two successful start-ups—one went public, the other was acquired. Now he draws on his experience and unique perspective on the "other side" as a venture capitalist helping entrepreneurs bring their dreams to fruition. **Busgang** offers detailed insights, colorful stories, and practical advice gathered from his own experience as well as from interviews with dozens of the most successful players on both sides of the game, including Twitter's Jack Dorsey and LinkedIn's Reid Hoffman. He reveals how to get noticed, perfect a pitch, and negotiate a partnership that works for everyone. An insider's guide to the secrets of the world venture capital, **Mastering the VC Game** will prove invaluable for entrepreneurs seeking capital and successful partnerships.

Entrepreneurs would do well to think strategically like investors. After all, founders are their own first investors. This book treats venture capital as a topic of entrepreneurial strategy, not finance, and includes a background of the industry, an explanation of all aspect of the VC Job Cycle and a framework called "VC Razor" for performing due diligence.

Seamlessly bridging academic accounting with real-life applications, **Crash Course in Accounting and Financial Statement Analysis, Second Edition** is the perfect guide to a complete understanding of accounting and financial statement analysis for those with no prior accounting background and those who seek a refresher.
