This text provides a comprehensive analysis of contemporary macroeconomics, within a European and global context. The authors balance the theoretical aspects with up-to-date policy examples throughout, allowing the reader to relate the concepts to their own economic environment.

The Eurozone crisis which started in spring 2010 as a Greek budget crisis has alerted Europeans that the issue of defaulting sovereigns is not one reserved just for the poor and poorest countries on this globe. The crisis painfully amplified that developed countries, too, might be hit by this phenomenon. To be sure, this insight is far from novel - the history of defaulting states reaches back into history for at least two millennia. And yet, lawyers have surprisingly abstained more or less completely from discussing this subject and developing possible solutions. Beginning with the Argentina crisis in 2001, this neglect began to vanish to a certain degree and this movement got some momentum in 2010 by the Eurozone crisis. The present book collects contributions from authors most of whom have participated in a conference on this issue in January 2012 at the Humboldt-Universität zu Berlin. The presentations, thus, provide a unique overview of the present discussion both from an economic and legal perspective.

IS-LM is perhaps the prime example of 'cognitive dissonance' in economics, and is problematic to many economists. On the one hand, the IS-LM model is still taught by many academic economists or they use it to derive the AD-AS approach. On the other hand, the same economists realize the limitations of the basic IS-LM model and would not now use it for policy analysis, as they did in the past. The distinction between pedagogical and analytical efficacy is made by all the authors in this volume regarding the IS-LM model. Indeed, even those who would reject using the model for modern policy analysis still see the basic model as useful for teaching purposes. Moreover, in an augmented form, some of the authors in this volume would even see fit to use IS-LM for modern policy analysis. As will be seen, therefore, the IS-LM model is 'not yet dead'. Rather, the model's 'plasticity' has enabled it to undergo a metamorphosis into augmented form, enabling its continuing utilization in economics accordingly.

First published in 1998, this volume contains an edited selection of papers presented at the Fifth International Research Seminar on 'Issues in Social Security', held on 14-17 June 1997 in Sweden by the Foundation for International Studies on Social Security (FISS) in memory of Brian Abel-Smith. The chapters cover a wide range of subjects related to old age pension reform, family policy, employment, privatization of social security and health care. The authors form a body of well-established researchers and scholars of world-wide reputation as well as younger scientists, stemming from various continents, and representing a range of relevant disciplines. This volume is the fourth in a series on international studies of issues in social security. The series is initiated by the Foundation for International Studies on Social Security (FISS). One of its aims is to confront different academic approaches with each other, and with public policy perspectives. Another is to give analytic reports of cross-nationally different approaches to the design and reform of welfare state programs.

Macroeconomics teaches students to be young economists, providing a contemporary approach to the subject and a wealth of real-life case studies to allow students to understand how economics works in practice. Responding to the financial crisis, this text explains the modern approach to macroeconomics with simplicity and rigour, while retaining the focus on particular characteristics of the European economy. The authors analyse different theoretical approaches and contextualise theory with up-to-date monetary policy examples. Helpful learning features throughout the text including; boxes, chapter summaries, key concepts, end of chapter exercises, and essay questions, support students' learning, and the book is accompanied by an extensive Online Resource Centre designed to help students take their learning further. Online Resource Centre: Student Resources: Sample exam questions Multiple choice questions Review questions Web appendices Web links Lecturer Resources: Power Point slides Excel based exercises for macroeconomic modelling Lecture plans Case studies Revision questions Solutions to end-of-chapter exercises Test bank VLE cartridge

Revised and updated for the 2nd edition, this textbook guides the reader towards various aspects of growth and international trade in a Diamond-type overlapping generations framework. Using the same model type throughout the book, timely topics such as growth with bubbles, robots and involuntary unemployment, financial integration and house price dynamics, policies to mitigate climate change and the persistence of religion in a globalized market economy are explored. The first part starts from the "old" growth theory and bridges to the "new" growth theory (including R&D and human capital approaches). The second part presents an intertemporal equilibrium theory of inter- and intra-sectoral trade, investigates innovation, growth and trade and limits to public debt as well as nationally and internationally optimal climate policies. The debt dynamics of the Euro Zone and the origins of intra-EMU and Asian-US trade imbalances are also explored. The book is primarily addressed to upper undergraduate and graduate students wishing to proceed to the analytically more demanding journal literature.

O Manifesto dos 74 deu o mote: é imperioso reestruturar a dívida. Este livro vai mais longe e apresenta três propostas europeias de reestruturação. Sejamos realistas: se nada for feito, a austeridade vai continuar por muitos anos; com a austeridade não haverá crescimento económico, e sem crescimento Portugal arrisca-se a não conseguir pagar o que deve. É mau para a zona euro mas pior ainda para os portugueses, que continuarão sufocados pelo garrote da dívida. A solução, argumenta João Cravinho, é dotar a União Europeia de mecanismos que permitam reestruturar a dívida pública criando a "folga" necessária ao crescimento. O Manifesto dos 74, que uniu personalidades portuguesas dos mais diversos quadrantes políticos, já tinha alertado para a imperiosa necessidade da reestruturação.João Cravinho, um dos mentores do documento, desmistifica as origens da crise da dívida (que são essencialmente bancárias); recorda exemplos históricos de reestruturação sem recurso à austeridade e analisa números e argumentos que sublinham a falta de credibilidade da estratégia oficial de redução da dívida. Há alternativas. Fiel ao espírito do manifesto reúne aqui três diferentes abordagens à reestruturação: a defendida por James K. Galbraith, Stuart Holland e Yanis Varoufakis, o ensaio PADRE e a solução proposta pelo Conselho de Peritos Económicos da Alemanha. Há outras saídas, mas na essência não diferem muito das apresentadas neste livro. O que falta é a coragem política de escolher um caminho. Nesse sentido A Dívida Pública Portuguesa, antecipa a forçosa discussão sobre o tema que vai dominar a política portuguesa (e europeia) nos próximos anos.João Cravinho nasceu em Malange, Angola, em 1936. É engenheiro civil pelo Instituto Superior Técnico, Master of Arts (Economics) pela Universidade de Yale e frequentou durante dois anos o Programa de Doutoramento (D. Phill) em Economia da Universidade de Oxford, que abandonou após o 25 de Abril. Foi Director Geral do Planeamento da Indústria, com Rogério Martins, fundador e director do Grupo de Estudos Básicos de Economia Industrial (GEBEI), consultor da OCDE, da UNESCO e da Comissão Europeia. Foi Fellow do Institute of Development Studies (IDS) da Universidade de Sussex e professor convidado do ISEG, do ISCTE e da Faculdade de Economia de Coimbra. Pertenceu ao MES e à Intervenção Socialista (GIS) antes de se filiar em 1976 no Partido Socialista, de que foi dirigente até 2009. Foi deputado,Vice-Presidente do Parlamento Europeu e membro da Comissão de Assuntos Económicos e Monetários. Exerceu os cargos de Ministro da Indústria e Tecnologia do IV Governo Provisório e de Ministro do Equipamento Social, do Planeamento e da Admnistração do Território no I Governo de Guterres. Foi membro do Conselho de Estado. De 2007 a 2011, foi administrador do Banco Europeu de Reconstrução e Desenvolvimento (BERD), com sede em Londres.

Sind die gängigen rechtsökonomischen Theorien in der Lage die Besonderheiten des Handels mit Finanzinstrumenten zu modellieren? Dieser Frage geht Jacob Bonavita in seiner Arbeit nach. Das Buch zeigt auf, dass die wissenschaftliche Aufarbeitung der Finanzkrise der Jahre 2007 und 2008 noch nicht abgeschlossen ist. Vor allem der Vielschichtigkeit der Rechtsordnung wurde innerhalb der Rechtsökonomie zu wenig Beachtung geschenkt. In seiner Arbeit analysiert Jacob Bonavita sowohl die rechtlichen als auch die makroökonomischen Besonderheiten des modernen Finanzwesens.
