of activities and experiences that promote physical development and offers practical guidance on how these can be facilitated. Physical development plays a crucial role in young children's learning, behaviour and emotional health and is now recognised as a prime area in the revised Early Years Foundation Stage. It is therefore essential that those working in the early years sector provide children with a wide range of opportunities for movement and sensory experiences. Drawing on current legislation and the requirements of the EYFS, the book covers all aspects of physical development and includes: □ reflection tasks, summaries and impact on practice sections; □ guidance on issues that can cause concern such as health and safety, rough and tumble play, gender and the effective use of indoor and outdoor space; □ advice on the role of the practitioner and ideas for

working with parents and families; □ information on the different stages of physical development. Written by leading consultants, this book will be essential reading for early years students and practitioners that want to fully understand young children's physical development and provide opportunities that nourish children's overall learning and physical and emotional wellbeing.

This chronologically-organized text is less expensive and briefer than most of the Human Lifespan texts. Its numerous examples drawn from education, nursing, and psychology make the content relevant to students from a variety of majors and backgrounds, while a highly praised study guide integrated into the text promotes and reinforces conceptual understanding. The new edition includes increased material on cognitive development and expanded

effectively draws readers into the text and holds attention. The author and editors have deliberately avoided complex mathematical equations in order to entice students into high school level science. Focus is on the people who contributed to development of the Periodic Table of the Elements. Students learn to read and apply the Table while gaining insight into basic chemistry and physics. This is one of our most popular courses among high school students, especially those who have a history of under-performance in science courses due to poor mathematical and reading comprehension skills. The course is designed for two high school transcript credits. Teachers may require students to complete all twelve chapters for two transcript credits or may select only six chapters to be completed for one transcript credit for Physical Science, Physics, or Chemistry. Compliance with state and
