An energy auditor's guide to using less, saving more, and choosing appliances and systems that will make your home healthier and more efficient. Many homeowners are beginning to examine the energy efficiency of their own homes, asking questions about where energy comes from and how much it costs, how to choose new appliances, and what options exist for renewable energy. The Home Energy Diet answers all these questions and more while helping readers take control of their personal energy use and costs so they can save money, live more comfortably, and help the environment. Energy auditor Paul Scheckel first explores energy literacy, and then describes how your home uses—and loses—energy you pay for via electricity, hot water, heating, air conditioning, windows, walls, and insulation. Energy efficiency is an investment that offers returns greater than Wall Street—and readers can potentially earn several hundred dollars every year just by following the advice in this book. As a bonus, many of these strategies, habits, and upgrades can make for improved indoor air quality and healthier, more comfortable homes. “A valuable resource [with a] humorous and down-to-earth style.” —Jim Gunshinan, managing editor, Home Energy
