Teodora has always longed to visit Venice, and at last she has her chance. But strange and sinister things are afoot in the beautiful floating city. Teo is quickly subsumed into a secret world in which salty-tongued mermaids run subversive printing presses, ghosts good and bad patrol the streets, statues speak, rats read, and librarians fluidly turn into cats. And where a book, *The Key to the Secret City*, leads Teo straight into the heart of the danger that threatens to destroy the city to which she feels she belongs. An ancient proverb seems to unite Teo with a Venetian boy, Renzo, and with the Traitor who has returned from the dark past to wreak revenge. . . . But who is the Undrowned Child destined to save Venice?

Process Safety Management and Human Factors: A Practitioner's Experiential Approach addresses human factors in process safety management (PSM) from a reflective learning approach. The book is written by engineers and technical specialists who spent the last 15-20 years of their professional career looking at behavioral-based safety, human factor research, and safety culture development in organizations. It is a fundamental resource for operational, technical and safety managers in high-risk industries who need to focus on personal and occupational safety management to prevent safety accidents. Real-life examples illustrate how a good, effective understanding of human factors supports PSM and positive impacts on accident occurrence. Covers the evolution and background of process safety management Shows how to integrate and augment process safety management with operational excellence and health, safety and environment management systems Focuses on human factors in process safety management Includes many real-life case studies from the collective experience of the book's authors

While driving in the Italian countryside, eleven-year-old Jackie's father suddenly collapses at the wheel. Fear for her father's life quickly turns to terror when two Italian men kidnap her and drive to their remote home in the countryside. Jackie soon discovers that her captors are actually a family, plagued by a mysterious secret. Award-winning novelist Donna Jo Napoli has created a haunting thriller that gives life to Jackie's utter desperation and determination to escape.

This study is an account of the life and work of the 15th-century Flemish master, Petrus Christus. It offers an examination of the physical characteristics of his paintings, and also places the artist in the context of the city of Bruges, where he lived and worked.

Describes how the president of the United States, Senators and members of the House of Representatives, and state and local officials are elected, and explains the importance of voting.

Autonomic Nerves - authored by the same team that created *Cranial Nerves* - provides an easy-to-follow format designed to make learning about autonomic nerves easier. Teachers, students, and practitioners will find vibrant illustrations integrated with text. Presented in two parts, the first describes the structure and function of the autonomic nerves. The second part addresses autonomic control of individual organ systems in a problem-based learning format. Throughout the text, *Autonomic Nerves* describes afferent pathways, integrating structures and mechanisms, efferent pathways, and the autonomic effectors. Principles of autonomic neurotransmission are also discussed.

Get Rolling on Your Most Inventive Artwork Ever! What lurks in the shadows of your imagination? This book takes you deep into the dusty corners and dark recesses where your most original ideas lie in wait, showing you how to lure them out into daylight, and shape them into fantastic yet believable concept art. Experimentation is the cornerstone of *Fantasy Genesis*. A series of dice rolls and corresponding word lists present you with an infinite variety of jumping-off points and visual problems to solve. The challenge (and the fun) is to meld seemingly unrelated and everyday elements such as a caterpillar, seashells, fire or a hammer into exceptionally curious, grotesque, oddly beautiful and totally unexpected creations. 40+ step-by-step mini-demonstrations illustrate basic techniques for drawing a wide range of fantasy elements and forms 3 game variations (complete with game sheets) lead you to create fiercely imaginative objects, creatures and humanoids 3 full-length demonstrations show how to play the game from your first rolls of the die to finished concept drawings Use this art-game as a warm-up, a bulldozer for creative-block or a daily sketching exercise to generate a stockpile of inspired beasties, heroes, costumes, weapons and other never-before-dreamt creations. It all starts with a roll, a word and your imagination.

This book presents the papers from the latest conference in this successful series on fuel injection systems for internal combustion engines. It is vital for the automotive industry to continue to meet the demands of the modern environmental agenda. In order to excel, manufacturers must research and develop fuel systems that guarantee the best engine performance, ensuring minimal emissions and maximum profit. The papers from this unique conference
