Digital art challenges archiving, collecting and preserving methods within and outside of gallery, library, archive and museum (GLAM) institutions. By its media, art in the digital sphere is processual, contextual, modular and ephemeral, and its creative process is collaborative. From artists, scholars, technicians and conservators-to preserve this contemporary art is a transdisciplinary task. This book brings together leading international experts from digital art theory and preservation, digital humanities, collection management, conservation and media art histories. In a transdisciplinary approach, theoretic and practice-based research from these stakeholders in art, research, education and exhibition are presented to create an overview of present preservation methods and discuss demands and opportunities for the future. Finally, the need for a new appropriate museum and archive infrastructure is shown to preserve the art of our time.

The work of the later Schelling (in and after 1809) seems antithetical to that of Nietzsche: one a Romantic, idealist and Christian, the other Dionysian, anti-idealist and anti-Christian. Still, there is a very meaningful and educative dialogue to be found between Schelling and Nietzsche on the topics of reason, freedom and religion. Both of them start their philosophy with a similar critique of the Western tradition, which to them is overly dualist, rationalist and anti-organic (metaphysically, ethically, religiously, politically). In response, they hope to inculcate a more lively view of reality in which a new understanding of freedom takes center stage. This freedom can be revealed and strengthened through a proper approach to religion, one that neither disconnects from nor subordinates religion to reason. Religion is the dialogical other to reason, one that refreshes and animates our attempts to navigate the world autonomously. In doing so, Schelling and Nietzsche open up new avenues of thinking about (the relationship between) freedom, reason and religion.

. . . the volume makes interesting reading. . . The language of the text is indeed lucid and the organization of the materials could not have been better. Arup Mitra, The Developing Economies This is an important book making a convincing case that structural elements are of crucial importance in filtering the impact of growth on poverty. A successful development strategy needs to address these structural elements at the country level and modify them in order to take greater advantage of the potential benefits of globalization in reducing poverty. Erik Thorbecke, Cornell University, US This volume makes an important contribution to our understanding of the complex relationship between economic growth and poverty reduction. The focus on assessing the impact of specific poverty-reduction interventions at the disaggregated, case-study level marks an important and welcome departure from the standard approach to research in this area . . . researchers and practitioners working in the field of poverty reduction and development in Asia and beyond will find much to interest them in this stimulating and informative volume. Colin Kirkpatrick, University of Manchester, UK Poverty Strategies in Asia is an examination of a wide range of measures aimed at reducing poverty in the region. It is widely recognized that while high and sustained economic growth is critical for poverty reduction, there are other policy interventions that may also be significant in a growth plus approach to poverty reduction. This volume brings together a series of case studies on the poverty impact of alternative interventions in a broad range of Asian economies. The measures examined within the book cover trade liberalization both in general and in a specific market, infrastructure investment (particularly in roads), population policies, cash transfers, microfinance, employment guarantee programs and contract farming. The countries covered include the Philippines, Lao PDR, Pakistan, India and Thailand. While the results illustrated by the contributors are mixed, they demonstrate the potential for further progress in poverty reduction. This latest joint publication by the ADBI and Edward Elgar Publishing will be warmly welcomed by scholars and researchers of Asian studies and development. Professional economists within international and bilateral development agencies and policymakers will also find much to engage them.

This book analyses the issue of Czech-German relations within Czechoslovakia between 1933 and 1938.
