Presented for the first time in book form, the source principles breathe energy, clarity and creativity into the development of every project. The source person is someone who gets an idea and then takes initiatives and risks to realize it. The source person's main task is clarifying what the next step in the development of the project should be. When she needs support, she invites other people to participate; they in turn become source of specific parts of the project. This is the way all our collectives are born. In life, people take on several source roles: the manager is invited to become the source of a team, the employee to be the source of her tasks, the musician

to be the source of his performance, the sportswoman to be the source of her good condition. Wherever there's a project, there's a source. The source principles shine a light on the way we engage with our own initiatives. The clarity they offer boosts our dedication and our capacity to encourage those around us to embark on their own source itinerary. Source principles invite us to live out a more inspired management style, they stimulate our creative involvement, and they give new meaning to our professional and personal alliances.

The internationally bestselling guide to "mind-reading" by influencing those around you via non-verbal communication, from human

psychology expert Henrik Fexeus. How would you like to know what the people around you are thinking? Do you want to network like a pro, persuade your boss to give you that promotion, and finally become the life of every party? Now, with Henrik Fexeus's expertise, you can. The Art of Reading Minds teaches you everything you need to know in order to become an expert at mind-reading. Using psychology-based skills such as non-verbal communication, reading body language, and using psychological influence, Fexeus explains how readers can find out what another person thinks and feels and consequently control that person's thoughts and beliefs. Short, snappy chapters cover subjects such as contradictory signs and what they mean, how people flirt without even

knowing it, benevolent methods of suggestion and undetectable influence, how to plant and trigger emotional states, and how to perform impressive mind-reading party tricks. Fexeus gives readers practical (and often fun) examples of how to effectively mind-read others and use this information, benevolently, both in personal and professional settings.

"Weaving together stories from sources as wide-ranging as classical literature, social and cognitive psychology, philosophy, art, and video games, *Propelled: How Boredom, Frustration, and Anticipation Lead Us to the Good Life* makes a lively case for the value of discontent in our lives. It offers novel, detailed, and scientifically informed characterizations of the nature and

outcomes of boredom, frustration, and anticipation. The book demonstrates why these three states should not be viewed as obstacles to our goals but as elements of the good life and explicates how they can illuminate our desires and expectations, inform us when we find ourselves stuck in unpleasant and unfulfilling situations, and motivate us to furnish our lives with meaning, interest, and value"--

Il libro è costituito da un progetto realizzato da Mari nel '74 e rappresenta uno stimolo (e una provocazione) per legare la creatività alla capacità costruttiva di ognuno, seguendo e/o modificando la traccia data dai disegni progettuali di Enzo Mari per la realizzazione di una sedia, un tavolo, un armadio, un letto. Il libro riprende la precedente pubblicazione

"Proposta per un'autoprogettazione" curata dal centro Duchamp e stampata in occasione della mostra alla Galleria Milano, alla quale si aggiungono i testi dello stesso Mari a commento di quest'operazione, la documentazione di ciò che la prima uscita del progetto ha provocato (lettere, commenti, articoli), immagini, disegni e una riflessione sull'attualità della riproposta di oggi.

By following the instructions in this book, you will become the manufacturer of an idea. This book is an instruction manual for a product that only exists if you build it. Here are the instructions. I have designed this device so that you can produce your food, using some inexpensive Ikea boxes and the directions in this book. This system uses hydroponics, a

farming technique that can be used to grow plants in water instead of soil. The reason for using hydroponics is very simple: hydroponics allows you to save up to the 90% of the water used in traditional agriculture systems, requires much less space, and provides you with full control of the nutrients needed by the plants at each stage of their growth. Another great thing about hydroponics is that you don't have to worry about watering the plants. The system I have designed combines different hydroponics techniques. These are adapted to make them easy to use at home. This means that you become a farmer, perhaps an urban farmer. However, this book is not a book on urban farming, nor is it a general book about hydroponics. This book is a manual that will show you how to build and run

Spin Have we all sunken into a species-wide bout of clinical depression? Porter's uproarious, intelligent debut centers on Raymond Champs, an illustrator of assembly manuals for a home furnishings corporation, who is charged with a huge task: To determine whether or not the world needs saving. It comes to him in the midst of a losing battle with insomnia — everybody he knows, and maybe everybody on the planet, is suffering from severe clinical depression. He's nearly certain something has gone wrong. A virus perhaps. It's in the water, or it's in the mosquitoes, or maybe in the ranch flavored snack foods. And what if we are all too sad and dispirited to do anything about it? Obsessed as he becomes, Raymond composes an anonymous survey to submit to his

unsuspecting coworkers □ □Are you who you want to be?□, □Do you believe in life after death?□, □Is today better than yesterday?□ □ because what Raymond needs is data. He needs to know if it can be proven. It's a big responsibility. People might not believe him. People, like his wife and his boss, might think he is losing his mind. But only because they are also losing their minds. Or are they? Reminiscent of Gary Shteyngart, George Saunders, Douglas Coupland and Jennifer Egan, Porter's debut is an acutely perceptive and sharply funny meditation on what makes people tick.
