Guide to the Euphonium Repertoire is the most definitive publication on the status of the euphonium in the history of this often misunderstood and frequently under-appreciated instrument. This volume documents the rich history, the wealth of repertoire, and the incredible discography of the euphonium. Music educators, composers/arrangers, instrument historians, performers on other instruments, and students of the euphonium (baritone horn, tenor tuba, etc.) will find the exhaustive research evident in this volume's pages to be compelling and comprehensive. Contributors are Lloyd Bone, Brian L. Bowman, Neal Corwell, Adam Frey, Marc Dickman, Bryce Edwards, Seth D. Fletcher, Carroll Gotcher, Atticus Hensley, Lisa M. Hocking, Sharon Huff, Kenneth R. Kroesche, R. Winston Morris, John Mueller, Michael B. O'Connor, Eric Paull, Joseph Skillen, Kelly Thomas, Demondrae Thurman, Matthew J. Tropman, and Mark J. Walker.

Newly-revised format features a 274 page book, two audio play-along / demonstration CDs, and a third CD with 168 printable PDF pages of transcribed solos (from the audio CDs) transposed for C, B-flat, E-flat, and bass clef instruments! All aspiring jazz players find themselves at a point in their development where they are ready to go from playing "right notes"

to playing meaningful solos, and making this essential leap can be frustrating. Intermediate Jazz Improvisation is for everyone wishing to bridge the gap between playing scales, chords, and licks to playing realistic, flowing jazz lines. It's specifically designed to build upon the knowledge you already have (basic chord and scale knowledge) to improve your understanding and skills as a soloist. The 2 play-along CDs include selected tracks from Aebersold play-alongs coordinated with exercises and solo examples played on a separate channel and notated in the book. All parts in the book are transposed for all instruments. "Useful for both private and classroom settings. Expanded version includes 168 pages of additional transcribed solos from the audio CDs in a third CD of printable PDFs (all transposed for your key)! The large, information-packed book is 276 spiral-bound pages and includes transposed parts for B-flat, E-flat, and bass clef instruments. This popular book has become a classic! Testimonials are many about how this book is helping musicians who feel they're on a plateau in their development! Highly recommended. In-depth, complete, and extensive don't even begin to describe the information in Intermediate Jazz Improvisation. With over 400 pages, this is one of the most extensive study books I have seen on the market today. And since it is published by Jamey Aebersold, you know it comes with play-along CDs. The topics covered in this book include the following: chromatic scales, half-diminished and altered dominant chords, melodic connecting and major cadences, cycles, turnaroun

This book includes a discussion of the many possible definitions of popular music, information on how popular musicians learn, and specific examples of educational programs that incorporate popular music with suggestions on how to choose high quality repertoire. --From publisher's description.

"In The Electric Guitar, scholars working in American studies, business history, the history of technology, and musicology come together to explore the instrument's importance as an invention and its peculiar place in American culture. Documenting the critical and evolving relationship among inventors, craftsmen, musicians, businessmen, music writers, and fans, the contributors look at the guitar not just as an instrument but as a mass produced consumer good that changed the sound of popular music and the self-image of musicians."--BOOK JACKET.
