The most widely used text in intermediate accounting, this 6th edition has been updated and refined, while retaining the traditional strengths of previous editions: accuracy, comprehensiveness, student acceptance, supporting materials, and quality and quantity of end-of-chapter material. It incorporates all FASB pronouncements through October 1988, and includes many new exercises and problems, updated illustrations and excerpts, a new software supplement using Lotus 1-2-3, and a revised pensions chapter.

The Study Guide, written by the text authors, provides chapter summaries, detailed illustrations, and a wide variety of self-study questions, exercises, and multiple-choice problems (with solutions).

The Sixth Edition of this well-respected intermediate text continues to provide the best conceptual and theoretical coverage in intermediate accounting. By doing so, students learn to understand, perform, and critically evaluate accounting practices and procedures. The focus of this revision is to make the text as student friendly as possible.

Libby/Libby/Short wrote this text based on their belief that the subject of financial accounting is inherently interesting, but financial accounting textbooks are often not. They believe most financial accounting textbooks fail to demonstrate that accounting is an exciting field of study and one that is important to future careers in business. When writing this text, they considered career relevance as their guide when selecting material, and the need to engage the student as their guide to style, pedagogy, and design. Libby/Libby/Short is the only financial accounting text to successfully implement a real-world, single focus company approach in every chapter. Students and instructors have responded very favorably to the use of focus companies and the real-world financial statements. The companies chosen are engaging and the decision-making focus shows the relevance of financial accounting regardless of whether or not the student has chosen to major in accounting.
