Are you an SAP Business One user who wants to make your life easier? Tune out the wide world of SAP and zone in on the SAP B1 tasks and transactions that support all of your critical processesfrom financials to production and beyond. With step-by-step instructions and tips from members of the SAP Business One North American Partner Advisory Council, including Carl Britton Lewis, this book is what you've been waiting for: The key to doing your job better in SAP B1.

SAP ERP modules are notoriously hard to configure and use effectively without a lot of practice and experience. But as SAP ERP Financial Accounting and Controlling: Configuration and Use Management shows, it doesn't have to be so difficult. The book takes a systematic approach that leads SAP Financial Accounting and Controlling (FICO) users step by step through configuring and using all the program's facets. This approach makes configuration complexities manageable. The book's author-SAP expert, trainer, and accountant Andrew Okungbowa-ensures that both you and your end users are up and running quickly and confidently with FICO. He also provides sound and tested procedures that ensure your implementation works without error. SAP ERP Financial Accounting and Controlling: Configuration and Use Management is in fact the most comprehensive and easy-to-follow SAP FICO configuration book in the market. It incorporates a hands-on approach, with hundreds of screen shots and practical examples, that allows a person without prior configuration training to make SAP FICO ready for use in the enterprise. You'll find that you don't need to be a rocket scientist to grasp the concepts explained and apply them to your work-even when the finances are complicated, such as with the ins and outs of taxes, currency conversions, or special general ledger entries such as down payments or bills of exchange. Providing an in-depth coverage of both configuration and end user procedures, the book covers most aspects of the SAP FICO certification syllabus-SAP's view of the module's key tasks and procedures-including: configuring and using the general ledger and accounts payable and receivable screens Configuring and completing closing procedures, asset accounting, and financial reporting Configuring global settings and enterprise variables Accounting for both profit and cost centers Creating a house bank Integrating FICO with other SAP modules Taking a jargon-free tone and providing an abundance of examples, Andrew Okungbowa provides a clear understanding of configuration techniques and the breadth of functionalities encompassed by SAP FICO. And as an accountant, Okungbowa understands the needs of end users as well as of those answering to the CIO.

This book on 'Configuring SAP Accounts Receivable & Accounts Payable (SAP S/4HANA Finance)' covers: Case Study Accounts Receivable and Accounts Payable Customer Accounts Vendor Accounts Incoming Invoices / Credit Memos Release for Payment Outgoing Payments Outgoing Invoices / Credit Memos Incoming Payments Payments with Payment Cards Dunning Open Item Clearing Down Payment Received Down Payment Made Adjustment Posting / Reversal Interest Calculation Closing Information System Apps for FI-A/R & FI-A/P The book starts with a case study that forms the basis for further discussions across the various chapters. The case study mirrors a real life business enterprise that wants to implement SAP Accounts Receivable and Accounts Payable components, as a part of configuring SAP FI. The book provides an overview of SAP Accounts Receivable (FI-A/R) and Accounts Payable (FI-A/P). It, then, goes on to discuss customer and vendor accounts, in detail. It outlines the structure of customer / vendor master records, and elaborates the preparations and the configuration settings that you may need to make in the system to create / change / delete the master records. It discusses the various business transactions of both FI-A/R and FI-A/P viz., incoming invoices / credit memos, release for payment, outgoing payments, outgoing invoices / credit memos, incoming payments, payments with payment cards, dunning, open item clearing, down payment received / made, adjustment posting / reversal, interest calculation, closing, information system and Apps for SAP FI-A/R and FI-A/P. It helps you to comprehend the configuration activities that you need to complete, in setting up these transactions in the system. For example, on configuring the settings for outgoing payments, it discusses (in detail) the global settings and the steps that are required for setting up the manual and the automatic payments. In dunning, it deals with basic settings, dunning procedure, printout, dunning process flow etc. In interest calculation, it starts with the fields (in customer / vendor master) that are relevant for item interest calculation and goes on to discuss the interest calculation process, global settings, actual interest calculation, interest posting and interest letters. In closing, it discusses the important closing operations like count (including balance confirmation), valuate and reclassify, in great detail. The book also discusses the FI-A/R and FI-A/P information system besides discussing the Apps for accounts receivable / accounts payable accountants, managers and credit controllers. As with other books on SAP, this also follows a case-study approach to make your learning easy. Every effort has been taken to guide you, step-by-step, in configuring your SAP system in implementing SAP Accounts Receivable and Accounts Payable, in SAP S/4HANA (1909), to meet your exact business needs. Each configuration activity has been discussed with appropriate screen shots (from an SAP system) and illustrations to help you 'see' what is being discussed in that activity / step. You will see a lot of additional information, provided across the Chapters and the Sections, to help you understand better a topic or a setting or a concept. The entire content of the book, vide various chapters, has been presented as in SAP IMG (Implementation Guide) for easy comprehension. You will come across with appropriate menu paths and Transactions, to help you to navigate the various configuration activities. In all, you can use this book as a desktop-reference for configuring SAP FI-A/R and FI-A/P.

Take an in-depth look at how basic financial accounting processes work in SAP S/4HANA in this practical guide. Learn about the SAP Fiori launchpad and how to find your way around the many apps available for finance with the help of screenshots and examples.  - Financial accounting processes in SAP S/4HANA - Finance organizational structure, key financial master data - Daily transactions using SAP Fiori apps - SAP Fiori apps for displaying and reporting financial data

Are you working with SAP software for the first time, or are you switching from SAP ERP and are confronted with SAP S/4HANA for the first time? Then this quick start guide with its concise overview of the functional scope and a clear introduction to the new SAP Fiori user interface is right for you. Clarify the terms ERP, HANA and S/4HANA, as well as the two licensing options for S/4HANA, on-premise and cloud. You will learn about the essential integrated business processes and how they are mapped in SAP S/4HANA using the Fiori apps. To do this, the authors take you through the modules related to logistics, such as materials management, sales and distribution, and production planning and control, and then demonstrate the integration with financial accounting and controlling. You will learn about the most important functions as well as organizational and master data objects, and by the end of the book you will also know which components are assigned to each module. Finally, using case studies, you will walk step by step through the three most important end-to-end processes in SAP S/4HANA: Order to Cash, Purchase to Pay and Forecast to Fulfill. - Cross-module presentation of business processes - SAP basic terms explained in a simple and understandable way - Introduction to the new user interface SAP Fiori - Includes 4 hours of video material

Invoice verification is an important business process in almost every company. In SAP you can verify invoices against purchase orders and goods receipts. SAP provides important functionalities like automatic account determination, financial posting, etc. SAP is powerful software that can meet the needs of any business scenario for any type of business in any part of the world. Its all encompassing nature makes SAP complex. In order to derive maximum benefit for business, SAP must be understood well. Mr. Agrawal attempts to explain SAP completely; a seemingly impossible task. This is his third book on the Materials Management module; his first two books in the Materials Management module are 'Purchasing' and 'Inventory Management'. In this book, like in his earlier books, he explains every screen of SAP MM Invoice Verification. Both the SAP Menu and Customizing Implementation Guide are expanded and the chapter number where they are covered is indicated. This not only creates a direct link between the book and the SAP software, but also ensures that the book is comprehensive. The author has taken care to balance details with overviews that explain linkages between concepts. The book is organized in chapters that are important business activities. Each chapter covers business processes carried out in SAP by the user as well as its related configuration. This book can be used to learn SAP from scratch; it is a learning guide. It is, therefore, useful to persons who are training to be SAP Consultants. Having learnt SAP with the help of this book, the Consultant keeps returning to refer to it. In implementation of SAP, Consultants prepare User Manual. With the availability of this book, their task becomes simpler. In the User Manual, they need to cover only implementation specific points. The user refers to this book as a generic User Manual. As the user gains knowledge he also begins to understand the customizing settings for his implementation. This book can also be used by Business Process Owners and Senior Managers to get an overview of SAP and the important choices it offers.

Interested in learning more about the changes in SAP S/4HANA Finance? Learn what is meant by the merge of financial accounting and controlling in SAP S/4HANA. Discover how the accounting structure and tables have changed and what the implications are.
