Overwinter (2010) is a werewolf novel by David Wellington. It is the sequel to his previous werewolf novel Frostbite, though this novel is only available in print; it was not first published online like some of his other novels.

Overwinter (novel) - Wikipedia

'Ravaged' is the second book in the 'Werewolves' series by David Wellington, and I must say it was a much better read than the first book, 'Cursed'. I did enjoy 'Cursed' but this was a much more exciting and engaging read. The story is full of mythology, ancient stories and spirits.

This is the follow up to Frostbite by David Wellington. I really enjoyed the first book and was anxiously awaiting this sequel. Wellington is a talented writer of modern horror and his twist on the sometimes exhausted supernatural/vampire/werewolf genre is exciting and nice change from the teenage angst and tortured souls one normally finds.

Overwinter book by David Wellington

Overwinter Frostbite is a werewolf novel by David Wellington, published in serial online in July, 2006 and in print in 2009. Plot summary. Frostbite takes place in the remote wilderness of Alberta. The setting is similar to the real world, but where werewolves (and possibly other supernatural phenomena) are rare but known phenomena. ...

The days grow colder. The nights grow longer. And every time the moon rises, the wolf inside her grows a little stronger. Cheyenne Clark—a woman whose hatred for werewolves has turned her into the very beast she most despises—prowls the Arctic Circle on the trail of an ancient secret, hunting for the one thing that could remove the lycanthropic curse and make her human again. Yet standing between Chey and her goal are a werewolf hunter armed with a diabolically brilliant weapon, a centuries-old werewolf with her own mysterious agenda...and Chey ' s own complicated feelings for the man who doomed her to this existence but on whom her life now depends. Worse, with every hour that passes, the wolf inside Chey becomes more powerful. It won ' t be long before the woman disappears completely, and only the beast is left.

When a strange wolf's teeth slashed Cheyenne Clark's ankle to the bone, her old life ended, and she became the very monster that haunted her nightmares for years. Worse, the only one who can understand what Chey has become is the man - or wolf - who's doomed her to this fate. He also wants her dead. Yet, as the line between human and beast blurs, so too does the distinction between hunter and hunted. Because someone is on the trail of Powell and Chey ?

First in the cult classic trilogy: “ A fantastic zombie novel . . . There are many layers to this zombie apocalypse, and this book just gets things rolling ” (Booklist). Welcome to New York City, Population Zero? The power grid has collapsed. There is no running water, no light, no heat. The massive neon signs of Times Square are dark now, and the subway trains crouch silent in their tunnels, waiting for commuters who will never return. An epidemic of staggering lethality has passed over the city and left nothing living in its wake. And yet the city is not deserted. The dead have returned to life, and they're hungry. The millions of people who once worked and lived in New York have been turned into cannibalistic monsters whose only function is to consume. No living person would dare enter the city--it would be suicide. Dekalb doesn't have a choice. He must protect his daughter's future, and that means retrieving vital medical supplies from the UN building in Midtown. A cadre of teenage girl soldiers have been recruited to help him find what he needs, and get back alive. They're well armed. They're devoted to their mission and willing to sacrifice anything to pull it off. But the odds against them are staggering. Especially when it turns out that not all zombies are created equal. Deep inside the city a medical student named Gary comes back from the dead different--his mind is intact. He can still think and feel. He's hungry, just like the rest, but unlike them he can plan, plot, and scheme. He can even lead the others, bending them to his will. Soon he has a small army at his command, a growing mob of rotting corpses all devoted to one cause: to find meat for their master. When Dekalb and Gary cross paths sparks will fly, destinies will clash--and the future of humanity will be decided, one head shot at a time.

Seeking revenge on a werewolf who killed her father, Chey journeys into the uninhabited forests of Canada's northwest and is horrified when she is rendered a lycanthrope herself and forced to bond with the man she has sworn to kill, a situation that is further complicated by a team of werewolf killers. Original.

Surviving the end of the world was the easy part? It's twelve years since the dead came back. Ravening, mindless zombies have devoured almost every living thing on the planet. The few, scattered survivors are surviving on canned goods and a refusal to give in and die. They are lead by Ayaan, a former child soldier turned brilliant strategist. She's twenty-eight years old, in a world where the average life expectancy is twenty-five. Together with her adopted ward Sarah, who has the psychic ability to see the life-force of the undead, she's gathered a few hundred survivors in Africa and given them safety, something to eat, and the possibility of a future. It would be a lot easier if the zombies weren't so well organized. Out of the east a dead prince has risen. The Tsarevich, the most powerful lich the world has yet seen, is able to command his fellow zombies and has crafted them into an unstoppable army. He has swept across Russia and eastern Europe, hunting down every survivor he can find. He's about to come down on Ayaan and her desert oasis like a tidal wave of death and horror. Yet quickly enough Ayaan realizes he's not just out for her destruction. He has something else in mind, a goal that will take him--and her--across oceans, all the way back to Colorado where the first zombies rose from the grave. He's going back to the Source and when he reaches it, no one will ever be safe again. The fate of all life on the planet is up for grabs, and if Ayaan and Sarah can't stop him there will be no more second chances?

The first book in the Laura Caxton Vampire series from the author of the Monster Island trilogy. All the official reports say that vampires are dead--extinct since the late '80s, when FBI agent Arkeley defeated the last vampire in a fight that nearly killed him. But when state trooper Laura Caxton calls the FBI looking for help in the middle of the night, Arkeley is unsurprised to hear that it sounds like a vampire attack. He's been expecting such a call to come eventually. Sure, it has been years since any signs of an attack, but Arkeley knows what most people don't: there is one left. In an abandoned asylum she is rotting, plotting, and biding her time in a way that only the undead can. Laura Caxton is out of her league on this case and more than a little afraid. Arkeley made it clear there is only one way out. The worst thing is the feeling that the vampires want more than just her blood. They want her for a reason, one she can't guess; a reason her sphinxlike partner knows but won't say; a reason she has to find out-or die trying.

They are the fearful images that have stalked humanity's nightmares for centuries, supernatural creatures that feast on flesh and haunt the soul, macabre and uncanny beings that frighten and fascinate the imagination. Vampires, Zombies, Werewolves, and Ghosts collects classic stories from literary masters inspired by folklore and mythology who dared to explore the darker side of human nature and crafted tales that defied convention, stirred up controversy, and gave life to a storytelling genre that has endured for generations. With stories by Charles Dickens, Rudyard Kipling, Henry James, Anne Sexton, Oscar Wilde, Yvonne Navarro, Fritz Leiber, Ramsey Campbell, Chelsea Quinn Yarbro, Angela Carter, and others...

This comprehensive analysis of literary responses to Antarctica examines the rich body of literature that the continent has provoked over the last three centuries, focussing particularly on narrative fiction. Novelists as diverse as Edgar Allan Poe, James Fenimore Cooper, Jules Verne, H. P. Lovecraft, Ursula Le Guin, Beryl Bainbridge and Kim Stanley Robinson have all been drawn artistically to the far south. The continent has also inspired genre fiction, including a Mills and Boon novel, a Phantom comic and a Biggles book, as well as countless lost-race romances, espionage thrillers and horror-fantasies. Antarctica in Fiction draws on these sources, as well as film, travel narratives and explorers' own creative writing. It maps the far south as a space of the imagination and argues that only by engaging with this space, in addition to the physical continent, can we understand current attitudes towards Antarctica.
