In recent years, a rise in incidents of juvenile delinquency and violence in American schools has led to increasing concern among school administrators, students, parents, and the general public. The frequency of these cases calls into question issues of safety, risk factors, and prevention strategies within the modern school system. Critical Examination of School Violence and Disturbance in K-12 Education is an authoritative reference source for the latest research on youth violence in schools, offering a thorough analysis of contributing factors to such incidents and possible solutions to prevent future occurrences. Highlighting relevant issues on zero tolerance policies, historical perspectives, and preventive actions, this book is ideally designed for school administrators, law enforcement, teachers, and researchers actively working in educational environments.

Written for students who are just beginning to study human services, this practical, easy-to-read guide provides a nuts-and-bolts overview of the field as well as a glimpse of what students can expect as they continue their education and begin working in their profession. Because the field encompasses many career opportunities, skills, and client populations, this text also helps students decide which specialty is right for them. AN OVERVIEW OF THE HUMAN SERVICES, 2nd Edition, provides a look at human services agencies, jobs, workers, and populations served; a clear analysis of the major theories of causality; and helpful special chapters on such important topics as ethics and stress management. It prepares students by challenging them to become active learners via self-reflection, case studies, real-world scenarios, applied and experiential activities, and inventories. This edition has been significantly revised and reorganized to improve coverage and flow of the material; for instance, with earlier and more detailed coverage of ethics, more information on two-year human service degrees, an entire chapter on case management, and a new chapter devoted to the issues and interventions related to interpersonal partner abuse, sexual assault (including military sexual assault), HIV/AIDS, and LGBT populations. OCR Psychology, Third Edition, is endorsed by OCR for use with the OCR AS Psychology specification. This book prepares students for all elements of the OCR Psychology AS exam. It covers both research methods and core studies, giving the who, what, where, and even the why of each study. It also looks at some of the work that followed the studies. Key features of the book include: 'Psychological Investigations': the first chapter of the book helps students to understand research methods in psychology – useful support for the Psychological Investigations exam and for understanding the core studies themselves. Core Studies: each study is described first 'in a Nutshell', followed by a detailed account of the aims, method, results and conclusions. Guidance is given on how each study can be evaluated and a wealth of extra materials is provided for each study – questions to assess understanding, practical activities, multiple choice and exam-style questions, further reading and video links. Background to each core study is included in the 'Starters' and 'Afters' features: information about related research before and after the study; and biographical details of the researcher(s). Approaches, perspectives, issues & methods are considered in a brand-new chapter to cover the themes of the course and prepare students for the long-answer questions on the Core Studies exam. Exam guidance: each chapter ends with short- and long-answer exam-style questions answered by students with teacher feedback. The book is presented in colourful and well-structured magazine-style spreads to aid the learning process. This 3rd edition has been completely revised, and is now accompanied by a companion website featuring an extensive range of online resources for both teachers and students, including answers to the questions posed in the book, glossary flash-cards, and multiple-choice test banks.

Based on the authors' extensive experience in crisis intervention and teaching crisis intervention courses, this authoritative text presents the latest skills and techniques for handling crisis situations. CRISIS INTERVENTION STRATEGIES, 8th Edition features the authors' task model, which illustrates and elucidates the process of dealing with people in crisis. Using this model, the authors build specific strategies for handling a myriad of different crisis situations, accompanied in many cases with dialogue that a practitioner might use when working with the individual in crisis. Two new chapters systematically illuminate the topics of families in crisis and legal and ethical issues in crisis intervention. US psychologist Abraham Maslow's A Theory of Human Motivation is a classic of psychological research that helped change the field for good. Like many field-changing thinkers, Maslow was not just a talented researcher, he was also a creative thinker – able to see things from a new perspective and show them in a different light. He studied what he called exemplary people such as Albert Einstein, Jane Addams, Eleanor Roosevelt, and Frederick Douglass rather than mentally ill or neurotic people. Maslow generated new ideas, forging what he called 'positive' or 'humanistic psychology'. His argument was that humans are psychologically motivated by a series of hierarchical needs, starting with the most essential first. His theories parallel many other theories of human developmental psychology, some of which focus on describing the stages of growth in humans.

'I recommend this book to anyone wishing to help children learn. In it you will find some lovely ideas for improving the way we encourage, support and praise all young people.' Professor Carol Dweck, author of Mindset, Stanford University, USA 'James has developed a rare skill for blending arresting anecdotes, hard-edged research and practical advice into a truly compelling narrative.' Professor Barry Hymr, author of the Gifted and Talented Pocket Book, Cumbria University, UK Over the last 20 years James Nottingham has studied how children learn. He has taught every age group in both primary and secondary schools, helped deal teenagers deal with anger and isolation and even done philosophy with three-year-olds. In this inspiring, humorous, and practical book he shows what you can do to help children of all ages develop into confident, thoughtful and independent learners. Based around the acronym ASK, this book explores attitudes, skills and knowledge to learning – what is required and how to develop these skills more effectively. It shows how to encourage independent thinking and a spirit of inquiry in your children. Highlights include: the dangers of calling our children clever, bright and gifted; the best ways to teach wisdom; how to help children excel in exams; why curiosity did not kill the cat. With a foreword written by John Hattie, Encouraging Learning draws on research from some of the most respected experts on thinking and learning to identify the best ways to help children learn more effectively, efficiently and co-operatively. For everyone living or working with children – particularly teachers, parents, carers and youth workers - this book shows you some of the best ways to enhance children's learning, including how to question, praise, and encourage more effectively.

In the realm of mental phenomena, experiment and measurement have hitherto been chiefly limited in application to sense perception and to the time relations of mental processes. By means of the following investigations we have tried to go a step farther into the workings of the mind and to submit to an experimental and quantitative treatment the manifestations of memory. The term, memory, is to be taken here in its broadest sense, including Learning, Retention, Association and Reproduction. (PsychINFO Database Record (c) 2004 APA, all rights reserved).

Liza Long, the author of 'I Am Aman Lanza's Mother'—as seen in the HBO® documentary A Dangerous Son—speaks out about mental illness. Like most of the nation, Liza Long spent December 14, 2012, mourning the victims of the Newtown shooting. As the mother of a child with a mental illness, however, she also wondered: "What if my son does that someday?" The emotional response she posted on her blog went viral, putting Long at the center of a passionate controversy. Now, she takes the next step. Powerful and shocking, The Price of Silence looks at how society stigmatizes mental illness—including in children—and the devastating societal cost. In the wake of repeated acts of mass violence, Long points the way forward.
