From Christian believers in the Apocalypse and the Rapture to New Age enthusiasts of prophecies concerning the year 2012, Doomsday lore has been a part of culture, a myth that colors how we perceive the world. Why do we remain obsessed with Doomsday myths even when they fail to materialize? What if we haven't recognized the true message of these myths? Blending history, psychology, metaphysics, and

Read Online Pumpkin Seed Point Being Within The Hopi

story, philosopher and author Joseph Felser explores the spiritual questions raised by these enduring myths. Along the way he consults the work of Joseph Campbell, Carl Jung, Marie-Louise von Franz, Black Elk, Wovoka, Itzhak Bentov, Jane Roberts, Seth, Hermann Hesse, Ingo Swann, David Bohm, Fred Alan Wolf, J. Allen Boone, William James, and Robert Monroe through ever-widening circles of understanding. Felser suggests that our obsession with "The End of the World" hides a repressed, healthy longing for reconciliation with our inner and outer worlds--with nature and our own natural spirituality. He urges us to recognize and act upon that longing. When we begin to listen to nature's voice and pay heed to our own dreams--including visions, intuitions, and instinctive promptings--the greatest revolution in all history will unfold. We can create a future of our own choosing, a beginning rather than an ending.

The series Religion and Society (RS) contributes to the exploration of religions as social systems - both in Western and non-Western societies; in particular, it examines religions in their differentiation from, and intersection with, other cultural systems, such as art, economy, law and politics. Due attention is given to paradigmatic case or comparative studies that exhibit a clear theoretical orientation with the empirical and historical data of religion and such aspects of religion as ritual, the religious imagination, constructions of tradition, iconography, or media. In addition, the formation of religious communities, their construction of identity, and their relation to society and the wider public are key issues of this series.

Drawn from Native American autobiographical accounts, a study revealing white society's program of civilizing American Indian schoolchildren

Explores the role of ETs in the military, government, technology, history, and the coming new age • Surveys contact with ETs, abductions, alien technology and exopolitics, genetic tampering by ETs, and the history behind the Nazis and UFOs • Contains interviews with Jesse Marcel, Michael Salla, Paul LaViolette, Robert Bauval, Helen Wambach, and others at the forefront of the ET-derived New Science movement The extraterrestrial presence on Earth is widening and, as we enter the Aquarian Age, will be admitted officially, causing shock and an urgent universal need to understand the social and technological changes derived from our space brothers. A primer for the explosive advances humanity will experience scientifically and spiritually in the coming years, this compendium explores the ET phenomenon and its influence on humanity past and present. The book surveys contact with ETs and abduction accounts, unexplained public and undisclosed military technology from aliens including anti-gravity devices, exopolitics (the influence of ETs in human affairs), the Iraqi Stargate, the Hybrid Project of alien interbreeding by abduction, Nazi ties to UFOS and their secret underground base in Antarctica, government cover-ups of alien interactions including Roswell, and the transformation triggered by the Hale-Bopp comet. Based on interviews with people who are witnessing the coming changes as well as those visionaries who are actually bringing them about--including John Mack, Major Jesse Marcel, Paul LaViolette, Robert Bauval, Michael Salla, and Helen Wambach--this book sketches out a breathtaking vision of the planetary revolution just around the corner.

"Education beyond the Mesas" is the fascinating story of how generations of Hopi schoolchildren from northeastern Arizona "turned the power" by using compulsory federal education to affirm their way of life and better their community. Sherman Institute in Riverside, California, one of the largest off-reservation boarding schools in the United States, followed other federally funded boarding schools of the late nineteenth and early twentieth centuries in promoting the assimilation of indigenous people into mainstream America. Many Hopi schoolchildren, deeply conversant in Hopi values and traditional education before being sent to Sherman Institute, resisted this program of acculturation. Immersed in learning about another world, generations of Hopi children drew on their culture to skillfully navigate a system designed to change them irrevocably. In fact, not only did the Hopi children strengthen their commitment to their families and communities while away in the "land of oranges," they used their new skills, fluency in English, and knowledge of politics and economics to help their people when they eventually returned home. Matthew Sakiestewa Gilbert draws on interviews, archival records, and his own experiences growing up in the Hopi community to offer a powerful account of a quiet, enduring triumph.

Between the 10th and 14th century's AD a grand civilization developed in what are now the 4 corners of the USA, encompassing approximately 10,000 square miles. Many scholars have studied this "Chaco Phenomena" and have ascertained that there was great influence from cultures of the South in what is now Mexico and Guatemala. Parrots, Macaws, cacao certain iconography and burial effects found in the Chaco Domain are consistent with materials mentioned in the Mayan Popol Vuh describing specific attributes of Ahauship (kingship) in Meso-America. These items have been found within the Chaco Domain. Implicit in the above is the use of Meso-American calendrics, which eluded scholars until recently. MacGillivray has rediscovered the use of the Hubbard site by analysis of original site interpolated with Mexica, Mayan and Zapotec; cosmological records of the Dresden Codex interfaced with the Tzolkin, showing a astronomical continuum in architecture and "day keeping traditions" for millenniums which is expressed in the Chacoan Tzolkin. The Aztec ruins in N.M. are of paramount importance in this ancient American tradition. Although having been "backfilled" years ago, the Hubbard tri-wall at Aztec, N.M. through archaeological documentation and new research proves itself to be a Venus calendar. Venus is very important in Indigenous cosmology as it represents Quetzalcoatl / Sacred Plumed Serpent, harbinger of the sun. The knowledge of Venus cycles shows advanced astronomical knowledge at Aztec suggesting that a specialized group of Shaman/Priests did live there, "the day keeper's and diviners" of the later Chaco Domain. The Hubbard Venus Calendar and Chacoan Tzolkin gives us a glimpse of what cosmology future scholars will find embodied in the two unexcavated tri-walls at Aztec on the Animas and else where in the Chaco Domain and Pan America.

In a quiet moment of therapy, a breakthrough comes -- the miracle of the new. To experience an epiphany is to have sudden insight into the essential meaning of something, unleashed sometimes in exquisitely slow motion, sometimes in a flash. In an intimate, lyrical integration of the science of psychology and transcendence of spirituality, celebrated clinician Dr. Ann Jauregui introduces us to nine individuals who have undergone astonishing transformations by exploring a world quite different from the one described by our five senses. With moments of miraculous and joyful surprise, *Epiphanies* exposes a reality outside of everyday existence that has momentous implications for life's ultimate questions. "Shyly we venture out with these stories," Dr. Jauregui writes, "into a world where science itself is struggling to describe a realm out of time and space and language." We are the beneficiaries of these extraordinary shifts of perspective, invited into a sparkling conversation that allows us to see the potential residing in all of us.
