The first registered nurse-midwife in the world was Sister Louisa Jane Barrett, who received training in Kimberley, South Africa, in 1891. There is almost no documentation as to who attended to births in South Africa prior to commencement of Dutch colonisation in 1652. From 1652, midwives could function independently and were certified and licensed.

The two-volume "Manual of Nursing" is a comprehensive and up-to-date work on the nursing profession in South Africa. It covers the whole nursing curriculum and broadens the student's scope of knowledge by discussing subjects not included in midwifery, critical care nursing, community nursing and psychiatric nursing. Easy referencing ensures that the set (encapsulating the integrated nursing course) is of immediate and practical use. This work discusses medical and surgical conditions from a nursing perspective. Volume One introduces certain basics of nursing theory and practice and it includes a section dealing with nursing-related services.

This title is directed primarily towards health care professionals outside of the United States. THE NURSING PROCESS; A GLOBAL CONCEPT critically explores a concept that was introduced into nursing in the 1970s and rapidly spread all over the world. It begins with the background and history of the Nursing Process, and analyses its use in various fields, such as managerial technologies and psychiatric nursing. It then goes on to look at its use in six different countries from a variety of world regions - in Europe, Finland, Germany and the Czech Republic, as well as South Africa, Australia and the Caribbean. It explores its strengths and weaknesses, and tries to make some predictions about future use. The book combines descriptions of the state-of-the-art based on extensive literature surveys, as well as analytical approaches. It creates opportunities for comparison, especially with regard to problem-solving strategies. Combines diverse perspectives of the core concept and its use Provides international overviews as well as detailed country reports Based on extensive literature surveys as well as analytical approaches Creates opportunities for comparison especially with regard to problem-solving strategies

THE FIRST BOOK TO PRESENT THE SUCCESSES, CHALLENGES, AND OPPORTUNITIES OF GLOBAL HEALTH NURSING This text is designed specifically for nurses and nursing students who have an interest in global health as a specialty, regardless of experience or education level. It reflects both the unique contributions of the nursing profession and of other disciplines, which is in keeping with the editors' perspective on how to bring about lasting change. The text views global health through a nursing lens, but maintains this awareness and appreciation of interprofessionalism throughout. The editors and contributors have firsthand experience of the complex dynamics in achieving global health, and bring a wealth of knowledge to this important field, which has grown as a course and specialty. The text depicts the worldwide expansion of nursing partnerships between resource-rich and resource-limited countries, discusses challenges and obstacles, and provides cases and guidance on how to achieve global health. It will appeal to all nurses, from student nurses embarking on a global health experience to more experienced global health nurses who offer professional nursing expertise from around the world. The text responds to a recent WHO mandate, which seeks the input of nurses and midwives as part of an interprofessional team of key strategists for facilitating global health. The Lancet report is also an important document used throughout the text, and an interview with Dr. Julio Frenk, author of that report, is included. Social, political, cultural, economic, and environmental factors—including climate change—are integrated into determinants of global health. The text covers the foundations of global health, including the emerging concept of climate justice, the ethical context of global health, and the importance of interprofessional education. It addresses key issues of global health with a focus on poor and vulnerable individuals—particularly women and children—and those living in areas of conflict. In addition to describing notable accomplishments toward achieving global health, the book focuses on the need for increasing access to primary care, improving clinical practice through expanded education, and engaging interdisciplinary researchers in discovery of viable solutions. The book includes the perspectives of nurses and colleagues from other disciplines in both resource-rich and resource-limited countries. References provide resources for additional study, and PowerPoint slides and a test bank for instructors accompany the text. KEY FEATURES Case studies depict real-world experiences Presents firsthand knowledge of global health dynamics, challenges, and opportunities Provides a wealth of information from multiple perspectives Authored by contributors across a variety of clinical and academic roles who are experienced in global health nursing and global health Includes chapters written by nurses from both resource-limited and resource-rich countries

She completed her BS in biology at Salem State University, an MSN in critical care nursing at the MGH Institute of Health Professions, and a PhD in nursing at Boston College Connell School of Nursing. Her research area is the nurse's role in treatment decision making in seriously ill adults. Her clinical interests are cardiac surgical and critical care nursing. Dr. Breakey's global nursing efforts are focused on prevention and treatment of rheumatic heart disease in resource-limited settings. She is a leader in Team Heart, a nonprofit organization that works in Rwanda. Dr. Breakey led a team that developed the teaching modules, both written materials and videos, which were translated into Kinyarwanda language for their patients. She has also organized and participated in ongoing nursing professional development

The basics of fundamental and general nursing science are presented in this health resource for auxiliary, enrolled, and registered general nurses. A strong community nursing focus infuses the outcome-based teachings and questions to stimulate further discussion. Practical information on nursing in South Africa is provided, including working in the legal framework, managing the challenges of nursing in a culturally diverse society, and dealing with patients suffering from HIV and AIDS. Medical teachings on the use of oxygen, temperature regulation, mobility, and skin integrity complement the ethical discussions.

"The South African nursing experience over 90 years has been adequately documented and may be found on the shelves of public libraries, university libraries and hospital libraries as well as between the pages of "struggle literature" such as Critical Health. This book does not attempt academic analysis per se, rather is it an authentic oral and written account of the experiences, which shaped the careers of black nurses. The sample of respondents was picked at random across the country, as time and private purse allowed. They were assured anonymity in that only first or nicknames would be used as a rule, except where a surname carries historical significance. In 1994, when the winds of changes blew democracy across the political landscape, the South African nursing profession too was gusted along the road of revolution. It was no longer a question of whether change would come, but when. Nonceba Lubanga in her chapter "Nursing in South Africa" has been given a detailed account of the struggle of black nurses, referring to them as "the unsung heroes of the African struggle in South Africa."--P. [4] of cover.

Midwifery across the globe faces different issues. In some countries the autonomy of the profession is a tradition, while in some societies midwives struggle to practice autonomously the basic competencies. In one part of the world the medicalisation of childbirth is the main issue, preventing the natural processes of pregnancy and childbirth to flow at their own pace, while in other parts of the world midwives struggle with lack of resources to provide safe midwifery care. The authors of this book practice midwifery in different cultures and within different social contexts. They have to deal with different obstacles and seek solutions to diverse problems. With their contributions, they offer an insight into their thinking, their dilemmas, and the problems of midwifery practices in their countries. However, despite different backgrounds, they all have in common a uniform goal - a wish to offer women optimal midwifery care and to improve midwifery services.
