An ideal resource for lecturers, this book provides a comprehensive review of experimental space astronomy. The number of astronomers whose knowledge and interest is concentrated on interpreting observations has grown substantially in the past decades; yet, the number of scientists who are familiar with and capable of dealing with instrumentation has dwindled. All of the authors of this work are leading and experienced experts and practitioners who have designed, built, tested, calibrated, launched and operated advanced observing equipment for space astronomy. This book also contains concise information on the history of the field, supported by appropriate references. Moreover, scientists working in other fields will be able to get a quick overview of the salient issues of observing photons in any one of the various energy, wavelength and frequency ranges accessible in space. This book was written with the intention to make it accessible to advanced undergraduate and graduate students.

meaner—is positive her life couldn't be any worse. Just when she's resigned herself to her fate, she sees a movie that will change her life—*Sixteen Candles*. But in her case, life doesn't imitate art. Tormented in school and hopelessly in unrequited love with a handsome football player, Davie finds it bittersweet to dream of Molly Ringwald endings. When a cruel school prank goes too far, Davie leaves the life she knows and reinvents herself in the glittery world of Hollywood—as a beautiful and successful lounge singer. Just as she's about to ride off into the L.A. sunset, the past comes back with a vengeance, threatening to crush Davie's dreams—and break her heart again. With wholly original characters and a cinematic storyline, *32 Candles* introduces Ernessa T. Carter, a new voice in fiction with smarts, attitude, and sassiness to spare.

This series is devoted to the publication of monographs, lecture resp. seminar notes, and other materials arising from programs of the OSU Mathemaical Research Institute. This includes proceedings of conferences or workshops held at the Institute, and other mathematical writings.

Liddell Hart's *History of the First World War* first appeared in 1930 and is widely regarded as one of the greatest, most cogent accounts of the conflict ever published. A leading military strategist and historian who fought on the Western Front, Liddell Hart combines astute tactical analysis with compassion for those who lost their lives on the battlefield. He provides a vivid and fascinating picture of all the major campaigns, balancing documentary evidence with the testimony of personal witnesses to expose the mistakes that were made and why. From the political and cultural origins of war to the twists and turns of battle, to the critical decisions that resulted in such devastating losses and to the impact on modern nations, this magnificent history covers four brutal years in one volume and is a true military classic.

From the bestselling author of *Going Home*, which Sophie Kinsella hailed as “fabulous,” comes a novel sure to touch and delight anyone who believes in love. Laura Foster is a hopeless romantic. Her friends know it, her parents know it—even Laura acknowledges she lives either with her head in the clouds or buried in a romance novel. It’s proved harmless enough, even if it hasn’t delivered her a real-life dashing hero yet. But when her latest relationship ends in a disaster that costs her friendships, her job, and nearly her sanity, Laura swears off men and hopeless romantic fantasies for good. With her life in tatters around her, Laura agrees to go on vacation with her parents. After a few days of visiting craft shops and touring the stately homes of England, Laura is ready to tear her hair out. And then, while visiting grand Chartley Hall, she crosses paths with Nick, the sexy, rugged estate manager. She finds she shares more than a sense of humor with him—in fact, she starts to think she could fall for him. But is Nick all he seems? Or has Laura got it wrong again? Will she open her heart only to have it broken again?
