The Boy Who Outwitted Mengele is the true story of Holocaust survivor, Michael (Miki) Popik. Miki grew up in the small town of Levice in Czechoslovakia. In 1944, his life changed forever. At the age of 13, Miki and his family were sent to the concentration camps at Auschwitz. Miki survived against all odds and ultimately triumphed to live a life of love."Miki Popik shares an incredible tale of survival, courage and resilience. He speaks of his life as a child in Czechoslovakia at the dawn of World War II, of his imprisonment at two concentration camps, of his family's struggles for survival, and his efforts after the war to locate his family. Though he was the only one from his extended family to survive, he felt very fortunate to have learned where in a mass grave in M hldorf, Germany, his father and brother had been interred. M hldorf was a sub-camp of the infamous Dachau, not far from Munich. Miki's story moves like none other."- Alan S. Blaustein, JD, MD\*In 2012, my classmates and I from the Sherman Block Supervisory Leadership Institute were fortunate to hear you speak at the Museum of Tolerance. Your words were truly inspiring! I left the museum that day speechless and humbled. I realized that nothing in my life can be assimilated to what you have experienced in yours. It shed a new light on the human race and how we treat one another."- Sergeant Robert O'Brine, San Bernardino County Sheriff's Dept.

The engrossing memoir of a spirited and glamorous young fashion designer who survived World War II, with an afterword by her daughter, Helen Epstein. In the summer of 1942, twenty-two year-old Franci Rabinek--designated a Jew by the Nazi racial laws--arrived at Terezin, a concentration camp and ghetto forty miles north of her home in Prague. It would be the beginning of her three-year journey from Terezin to the Czech family camp in Auschwitz-Birkenau, to the slave labor camps in Hamburg, and Bergen Belsen. After liberation by the British in April 1945, she finally returned to Prague. Franci was known in her group as the Prague dress designer who lied to Dr. Mengele at an Auschwitz selection, saying she was an electrician, an occupation that both endangered and saved her life. In this memoir, she offers her intense, candid, and sometimes funny account of those dark years, with the women prisoners in her tight-knit circle of friends. Franci's War is the powerful testimony of one incredibly strong young woman who endured the horrors of the Holocaust and survived.

This book offers a radically new and definitive reappraisal of Allied responses to Nazi human experiments and the origins of informed consent. It places the victims and Allied Medical Intelligence officers at centre stage, while providing a full reconstruction of policies on war crimes and trials related to Nazi medical atrocities and genocide.

How much of history is an illusion? Did the Third Reich's most notorious Nazi, Heinrich Himmler, really take his own life at the end of the Second World War? A fifty-year-old manuscript, written by Erich Koch, the young officer who accompanied Himmler, reveals that the Reichsfuhrer of the SS in fact survived and escaped to England. As Himmler realises that Germany's defeat is inevitable, he lays his clever, ruthless plans, meticulously working out every detail for his escape, and ensuring that he covers his tracks. Isherwood fleshes out Koch's manuscript to reveal how a double, made to look even more like Himmler by the evil Dr. Josef Mengele, is the one who takes the cyanide capsule. Safely brought to England with his innocent comrade, Erich Koch, Himmler is met by a local smallholder of German origin. But how long will Himmler be content to raise chickens and pigs? How long will it be before Erich realises the true past of his comrade? And how long can they hide from the determined and resourceful Nazi-hunters?

After her castle and clothes are destroyed by the dragon, Princess Elizabeth, dressed only in a paper bag, sets out to rescue Prince Ronald, who was taken captive.

This riveting work of investigative reporting and history exposes classified government projects to build gravity-defying aircraft--which have an uncanny resemblance to flying saucers. The atomic bomb was not the only project to occupy government scientists in the 1940s. Antigravity technology, originally spearheaded by scientists in Nazi Germany, was another high priority, one that still may be in effect today. Now for the first time, a reporter with an unprecedented access to key sources in the intelligence and military communities reveals suppressed evidence that tells the story of a quest for a discovery that could prove as powerful as the A-bomb. The Hunt for Zero Point explores the scientific speculation that a "zero point" of gravity exists in the universe and can be replicated here on Earth. The pressure to be the first nation to harness gravity is immense, as it means having the ability to build military planes of unlimited speed and range, along with the most deadly weaponry the world has ever seen. The ideal shape for a gravity-defying vehicle happens to be a perfect disk, making antigravity tests a possible explanation for the numerous UFO sightings of the past 50 years. Chronicling the origins of antigravity research in the world's most advanced research facility, which was operated by the Third Reich during World War II, The Hunt for Zero Point traces U.S. involvement in the project, beginning with the recruitment of former Nazi scientists after the war. Drawn from interviews with those involved with the research and who visited labs in Europe and the United States, The Hunt for Zero Point journeys to the heart of the twentieth century's most puzzling unexplained phenomena.
