Praise for Why Kids Kill We desperately need this book. It provides an interior view of the mind of rampage school shooters that helps us understand the origins of the narcissism, paranoia, sadism, and thwarted rage that appears to motivate them.

~~Why Kids Kill: Inside the Minds of School Shooters~~...

Why Kids Kill is a fascinating book in which Langman provides the reader with an insight into the minds of kids so disturbed that they're able to murder their peers and teachers in cold-blood, without the slightest bit of empathy towards their victims. Langman's method of evaluating the shooters is primarily done by categorising them into three types: Psychotic, Psychopathic, and Traumatized shooters.

Ten years after the school massacre at Columbine High School in Colorado, school shootings are a new and alarming epidemic. While sociologists have attributed the trigger of violence to peer pressure, such as bullying and social isolation, prominent psychologist Peter Langman, argues here that psychological causes are responsible. Drawing on 20 years of clinical experience, Langman offers surprising reasons for why some teens become violent. Langman divides shooters into three categories, and he discusses the role of personality, trauma, and psychosis among school shooters. From examining the material evidence of notorious school shooters at Columbine and Virginia Tech to addressing the mental states of the violent youths he treats, Langman shows how to identify early signs of homicide-prone youth and what preventive measures educators, parents and communities can take to protect themselves from the tragedy.

In the horrific aftermath of school shootings, distraught communities struggle to make sense of these seemingly senseless acts. Despite massive media coverage, we know little about what drives young perpetrators or how they rationalize their acts. In this breakthrough analysis, Dr. Peter Langman presents the psychological causes of school shootings and offers unprecedented insight into why certain teens exhibit the potential to kill. He shows how to identify early signs of possible violence and offers preventative measures that parents and educators can take to protect their communities.

A retired lieutenant colonel and the founder of the Parent Coaching institute join forces to make the case that violence in media and games conditions children to take it for granted as an acceptable part of life and trains them to be successful instigators of violence. Original.

Jonathan Paul goes behind the sensationalist headlines of 'child killers' to investigate why these crimes happen. He examines child homicide in today's violent, confusing world and contextualises it against the cruel unforgiving retribution of yesterday. Children are increasingly experimenting with drugs and committing offences, but there are those who commit the worst possible crimes: to end another person's life before their own could properly have begun. The cases are shocking but sometimes the path towards them is even more so. This is a fascinating exploration of disturbing events aimed at discovering what happens when childhood is trodden underfoot, and when and why kids kill.

"Out of all the relationship books I've read, this one's at the top of my list! The first book I would recommend to anyone. It's funny, inspiring, with incredibly powerful ideas." — Dr. Mike Nichols "The principles in this book have literally changed my life, and given me practical tools for every relationship. I am confident it can do the same for you, wherever you are on your journey." — Melissa Drobnak "This book gives hope to the hopeless relationship. Each chapter gets straight to the heart of relationship issues and provides the know how to make change happen." — Chelsea Wells Filled with moments to make you laugh, stories to inspire you, and insights to find effective solutions, these pages contain tools for every relationship you face. Developed from decades of research and clinical experience, Dr. Nealy Brown has introduced thousands across the globe to these life changing truths. Learn how to navigate difficult situations, quickly end conflicts, and touch cold hearts, even in your most challenging relationships, through simple, practical methods. Discover true stories of people facing impossible bosses, shattered marriages, and distant kids, and the steps that lead to amazing relationships where you never before thought it was possible. Restore your marriage even after your spouse has walked out. Heal that relationship with your teenager who's slipping away. Revive your work life in the job you dread to face each day. Strengthen your healthy relationships even further.

A tragic portrait of adolescents who kill their parents is revealed in this volume: these young people almost always kill out of desperation as they are almost always victims of severe child abuse, neglect and dysfunctional parenting. Drawing upon her experience as a clinician, expert witness and scholar, the author asserts that a combination of interconnected problems creates the conditions for parricide, including: severe

sexual, physical and/or verbal abuse of the child; escalating violence in the family; and increasing vulnerability of the child to stressors in the home. This sensitive volume includes an examination of interventions that are effective in treating such children. Heide concludes that ado

An exploration of the world of parricide presents the stories of eight children accused of killing their parents, discussing the facts in their cases and the outcome of their trials. Reprint. AB.

A special kind of horror is reserved for mothers who kill their children. Cases such as those of Susan Smith, who drowned her two young sons by driving her car into a lake, and Melissa Drexler, who disposed of her newborn baby in a restroom at her prom, become media sensations. Unfortunately, in addition to these high-profile cases, hundreds of mothers kill their children in the United States each year. The question most often asked is, why? What would drive a mother to kill her own child? Those who work with such cases, whether in clinical psychology, social services, law enforcement or academia, often lack basic understandings about the types of circumstances and patterns which might lead to these tragic deaths, and the social constructions of motherhood which may affect women's actions. These mothers oftentimes defy the myths and media exploitation of them as evil, insane, or lacking moral principles, and they are not a homogenous group. In obvious ways, intervention strategies should differ for a teenager who denies her pregnancy and then kills her newborn and a mother who kills her two toddlers out of mental illness or to further a relationship. A typology is needed to help us to understand the different cases that commonly occur and the patterns they follow in order to make possible more effective prevention plans. *Mothers Who Kill Their Children* draws on extensive research to identify clear patterns among the cases of women who kill their children, shedding light on why some women commit these acts. The characteristics the authors establish will be helpful in creating more meaningful policies, more targeted intervention strategies, and more knowledgeable evaluations of these cases when they arise.

En ni-årig pige fortæller om livet i en lille sydstatsby og om sin fars indsats som sagfører for en uskyldigt anklaget neger

In the last decade, school shootings have decimated communities and terrified parents, teachers, and children in even the most "family friendly" American towns and suburbs. These tragedies appear to be the spontaneous acts of disconnected teens, but this important book argues that the roots of violence are deeply entwined in the communities themselves. *Rampage* challenges the "loner theory" of school violence and shows why so many adults and students miss the warning signs that could prevent it.
