The International Bureau of Weights and
Measures (BIPM) is currently
implementing the greatest change ever
in the world's system of weights and
measures — it is redefining the
kilogram, the final artefact standard, and
reorganizing the system of international

Atoms last a long time, in most cases forever. They can change and undergo chemical reactions, sharing electrons with other atoms. But the nucleus is very hard to split, meaning most atoms are around for a long time. Structure of the Atom At the center of the atom is the nucleus. The nucleus is made up of the protons and neutrons.
