Galileos Journal 1609 1610 - aplikasidapodik.com

Aristotelian doctrine stipulated that celestial bodies were perfectly smooth and spherical. Drawing reproduced from Galileo's 1610 Sidereus Nuncius. The first telescopic observations of the Moon on record were carried out by the English man Thomas Harriot (ca. 1560-1621), on the evening of July 26, 1609. However, based on his extant correspondence, as well as entries in his notebooks, as in the case of sunspots, Harriot did not appear to have drawn any particular physical significance from ...

Galileos Journal 1609 1610 - portal-02.theconversionpros.com

In the fall of 1609 Galileo began observing the heavens with instruments that magnified up to 20 times. In December he drew the Moon's phases as seen through the telescope, showing that the Moon's surface is not smooth, as had been thought, but is rough and uneven. In January 1610 he discovered four moons revolving around Jupiter.
