Description. Leading physical chemist David Chandler and his colleague David Wu have prepared a solutions manual to Introduction to Modern Statistical Mechanics (Oxford 1987 - ISBN: 9780195042771), to be used as an ancillary to the text. The instructive numerical work in the manual is an important supplement, because the material can only be learned by tackling the exercises.

Obtain $p(x)dx$, that is, the probability of finding the oscillator with position between x and $x+dx$. Note that it is enough to calculate $dT=T$, where T is a period of oscillation, and dT is an interval of time, within a period, in which the amplitude remains between x and $x + dx$. Draw a graph of $p(x)$ versus x .
